Aditya Koundinya

linkedin.com/in/aditya-r-koundinya | adi.koundinya@gmail.com | Bengaluru

Summary

Senior Cloud & DevOps Engineer with hands-on experience building secure, scalable, and automated infrastructure on AWS and Azure. Skilled in Infrastructure as Code (Terraform, Pulumi, CloudFormation) and container platforms (ECS, EKS), with a strong focus on DevSecOps and disaster recovery. I've led cloud migrations, cost optimization, and security automation initiatives using AWS native tools as well as Palo Alto XSIAM, Wiz, and CrowdStrike. Beyond delivery, I enjoy mentoring teams, collaborating with clients, and sharing knowledge — including speaking at AWS Community Day and contributing to internal training and PoCs.

Experience

Presidio | Bengaluru, Karnataka
Senior Engineer | 08/2024 - Present

- Led cloud-native modernization initiatives for high-frequency event processing platforms by modernizing and containerizing 56+ Python-based microservices onto Amazon EKS, improving scalability, reliability, and operational efficiency.
- Architected resilient event-driven and GitOps-based delivery ecosystems using EventBridge Pipes, SQS, ArgoCD ApplicationSets, Helm, Jenkins, and Amazon EKS, enabling automated multi-environment deployments, streamlined CI/CD workflows, and zero-drift infrastructure consistency.
- Enhanced platform security, resilience, and scalability through implementation of AWS Pod Identity (IRSA), KEDA-based autoscaling, HPA, PDB, Secrets Store CSI Drivers, and standardized Kubernetes deployment frameworks across enterprise-grade workloads.
- Led cloud migration efforts for **7+ business-critical applications**, collaborating with the customer's Program Management team to ensure smooth transitions.
- Enhancing the cloud infrastructure by modernizing and optimising services, focusing on AWS solutions for improved scalability and security.
- Driving the development of DevOps strategies to increase agility and efficiency in cloud environments.
- Mentored interns and junior engineers on AWS migrations, automation, and onboarding tasks, accelerating delivery readiness.
- Partnered directly with client Program Management Offices (PMOs) to align migration roadmaps with business goals; received **5+ direct recognitions from client leadership** for initiative, delivery, and security-focused engineering.

- **Key Projects:**
  - **iGaming Platform Modernization:** Led cloud-native modernization of large-scale event-driven iGaming platforms on Amazon EKS by implementing scalable architectures, GitOps-driven deployments, enterprise CI/CD pipelines, and Kubernetes-native security and autoscaling practices.
  - **Healthcare Cloud Migration and Modernization:** Supported large-scale healthcare platform migrations and modernization initiatives, ensuring scalable, secure, and seamless cloud transitions.
  - **Healthcare DevOps Strategy Enhancement:** Enhanced DevOps processes and automation practices for healthcare platforms to improve deployment efficiency, operational agility, and infrastructure reliability.

Presidio | Bengaluru, Karnataka
Cloud Engineer | 08/2023 - 07/2024

- Developed scalable and resilient AWS infrastructure using Infrastructure as Code (IaC) tools like CloudFormation.
- Automated S3 and EC2 migrations across AWS accounts, leading to enhanced operational efficiency and improved disaster recovery processes.
- Managed cost optimization strategies, saving ~$200 per month (~$2.4K annually) by eliminating unutilized resources.
- Actively contributed to **cost optimization automation** by not just building scripts but also coaching peers on efficient resource management.
- Collaborated across client teams to standardise infra, introducing Terraform/Terragrunt workflows

- **Key Projects:**
  - ***AWS Infrastructure and Disaster Recovery**:* Built and automated AWS infrastructure, improving disaster recovery processes with AWS DRS.
  - ***Cost Optimization Automation**:* Developed Python scripts to systematically detect and clean up unused EC2 volumes and snapshots, reducing costs and enabling peer adoption across teams..

Presidio | Bengaluru, Karnataka
Associate Cloud Engineer | 08/2022 - 08/2023

- Played a key role in the implementation of AWS environments for various clients, focusing on infrastructure automation and security enhancements.
- Utilized Terraform and Pulumi to manage and deploy cloud resources across multiple regions, ensuring consistency and scalability.
- Contributed to cloud readiness assessments and infrastructure optimization for clients in the educational sector.
- **Key Projects:**
  - **Educational Infrastructure Automation**: Developed cloud infrastructure using Pulumi and TypeScript to support scalable educational content delivery systems.
  - **Performance Optimization with ElastiCache**: Improved application performance by implementing ElastiCache and building failover mechanisms for high availability.

Presidio | Bengaluru, Karnataka
Cloud Engineer Intern | 02/2022 - 08/2022

- Gained experience in cloud management and automation, focusing on AWS services and Infrastructure as Code (IaC) deployment.
- Assisted in the migration of workloads and the development of CI/CD pipelines to automate deployments and ensure seamless updates.
- **Key Contributions:**
  - Supported cloud infrastructure projects by automating migrations and improving security through IAM policy management and monitoring tools like CloudWatch.

ATEU Softwares | Mysuru, Karnataka
Intern | 08/2021 - 09/2021

- Led a team in the development of proprietary software utilizing neural networks and Natural Language Processing (NLP).
- The software analyzed customer reviews, generating actionable insights and data to help improve the company's services.
- Coordinated the project’s architecture and implementation, ensuring effective integration of machine learning algorithms with customer feedback systems.

Amphisoft Technologies Pvt. Ltd. | Mysuru, Karnataka
Intern | 03/2021 - 04/2021

- Completed training and an internship focused on IoT and automation.
- Led a team in the design and implementation of IoT solutions, including greenhouse monitoring systems.
- Gained hands-on experience with projects such as automated parking systems and motion sensing devices.

Skills

- **Cloud Technologies:** AWS (ECS, EKS, RDS, DynamoDB, S3, VPC, CloudFormation), Terraform, Pulumi
- **DevOps**: CI/CD (GitHub Actions, Jenkins, AWS Code Pipeline), Docker, Kubernetes
- **Programming Languages:** Python, TypeScript, C, C++
- **Automation & Orchestration:** AWS CDK, AWS CodeDeploy, AWS CloudFormation
- **Security:** IAM, MFA enforcement, Security Policies, Disaster Recovery
- **Tools & Platforms:** GitLab, GitHub, Jenkins, AWS Transit Gateway, AWS CloudWatch
- **Security tools:** Palo Alto XSIAM, Wiz, CrowdStrike.
- **AWS Security services:** GuardDuty, Config, Inspector, KMS, SCPs.
- **Observability:** Prometheus, Grafana, AWS RUM, Synthetic Canaries.
- **Collaboration tools:** Confluence, Atlantis, Terragrunt.

Education

Birla Institute of Technology and Science, Pilani
Master of Technology (MTech) | 07/2025
CGPA 7.08/10

Maharaja Institute of Technology, Mysore
Bachelor of Engineering (BE) | 03/2022
CGPA 7.87/10

Languages

English, Kannada, Hindi

Certificates

AWS Certified Machine Learning Engineer - Associate

AWS Certified SysOps Administrator - Associate

Microsoft Certified: Azure Data Fundamentals

Awards

- AWS Community Day Bengaluru 2025 – Speaker
- AWS GameDay Winner – AWS India Observability Day 2025
- Above and Beyond award for Q2 2025
- Spot Award for the month of May 2024
- Spot Award for the month of December 2023
- Presidio Hackathon Winner 2022

Publications & Research

- From Complexity to Security: A Case Study on MFA Implementation for a Healthcare Provider

Authored technical blog on scaling MFA across 300 AWS accounts; published on the Presidio website.

- **M.Tech Dissertation – EcoTrack (FinOps + Sustainability monitoring)**.

Cloud-native solution for tracking AWS cost & carbon footprint with Grafana dashboards and automated reporting.

- **Internal PoCs** (AWS Observability, Rancher RKE2)

Led PoCs on AWS RUM + Synthetic Canaries for monitoring and Rancher RKE2 orchestration, with outcomes documented in Confluence for team reuse.

Leadership & Community Impact

- **Speaker, AWS Community Day Bengaluru 2025** – Delivered a technical talk on enterprise AWS cost optimization, FinOps governance, and cloud efficiency engineering.
- Hosted **Toastmasters Club** at Presidio Bengaluru (leadership & communication).
- Guided **AWS and Azure cloud security training** cohorts, hosted peer-learning sessions, and supported team development initiatives.
- Organised Presidio Exchange 2024 and multiple cultural events as part of the Admin Focal Group
